PROFILE

I have made a transition into software development after finding that my previous pursuit in visual arts no longer provided me the opportunity to grow.

I am excited to enter a industry that is filled with constant innovation and a space that pushes one for constant development and excellence with no bounds of possibilities.

SKILLS

Languages:
JavaScript, HTML, CSS, Sass, MySQL

Technologies:
React, Node.js, Express.js, APIs, Web APIs, User Authentication, Agile Development, OAuth, Jest

Tools:
VS Code, Git, GitHub, Postman API, Jira, Netlify, Heroku

PROJECTS

Full Stack Developer | ThriveVibe

Nov 2023 - Dec 2023, BrainStation Final Project

- ThriveVibe is a dynamic, game-changing platform designed to empower content creators on their journey by offering a unique combination of real-time feedback and connection opportunities.
- Frontend is built using React, Node, Sass and Javascript.
- Backend is built using Node and Express.js
- Implemented database using MySql and Knex.js.

Frontend Developer | British Airways Hackathon

Nov 2023, BrainStation 24hr Hackaton

- I participated in a 24-hour hackathon hosted by British Airways where I collaborated with UI/UX Designers, data scientist and software engineer to develop a solution to solve the problem of 'How might we encourage customers to book flights using their travel voucher?'

EDUCATION

BrainStation | Diploma, Software Engineering

SEP 2023 - DEC 2023, LONDON, UK

University of the Arts London | Bachelors in Arts, Textile Design

SEP 2019 - JUNE 2023, LONDON, UK

EXPERIENCE

Studio Intern | Jekeun

JAN 2022 - FEB 2022, LONDON, UK

- Developed and made colorized technical drawings with Adobe Illustrator and Photoshop
- Copied patterns and carried out pattern cutting tasks
- Completed tasks related to using the sewing and the heat press machine
- Make spec sheets, organize and carry out errands for the studio
